May 8-21

Monday, May 8, 12:00 - 1:00 p.m.

Pharmacology and Therapeutics Seminar Series

Cardiac arrhythmias and muscle disorders at high resolution: structural insights into calcium-selective ion channels

Dr. Filip Van Petegem

Click [here](#) for more info

Monday, May 8, 12:30 - 1:30 p.m.

JGH Medical Grand Rounds

Handover as an entrustable professional activity

Dr. Tino D. Piscione

Click [here](#) for more info

Monday, May 8, 4:00 - 5:00 p.m.

Meakins-Christie Research Seminar Series

Mechanisms of influenza virus-activated cell death

Siddharth Balachandran, PhD

Click [here](#) for more info

Tuesday, May 9 at 8:30 a.m.

Scientific Platforms Meeting (SPM) and Networking Dinner

This scientific platforms meeting (SPM) will bring together managers, directors and administrators of shared scientific infrastructure platforms from across Canada. The day will be highly interactive and will finish with a networking dinner. So come on out and meet your peers and help develop solutions for sustaining the resources you manage.

Tuesday, May 9 at 4:00 p.m.

Killam Seminar Series

GABAergic synapses as possible targets of autism spectrum disorders

Dr. Enrico Cherubini

Click [here](#) for more info

Wednesday, May 10, 8:00 a.m. - 9:00 a.m.

Monday, May 8, 12:00 - 1:00 p.m.

RI-MUHC Pediatric Research Seminar

Do anesthetics damage developing brains? The neurotoxicity dilemma

Dr. Davinia E. Withington

Click [here](#) for more info

Monday, May 8 at 1:00 p.m.

Feindel Brain Imaging Lecture Series

What can the neuroimaging community learn from monkey research and vice versa

Sebastien Tremblay

Click [here](#) for more info

May 8-9

World Health Summit Regional Meeting

The world leaders in global health will be attending this prestigious event, including over 800 researchers, doctors, industry leaders, decision-makers, government members and civil society actors from around the world.

Based on the theme of “**Health and healthcare delivery in pluralistic societies,**” this interdisciplinary event will focus on the question of human diversity in the practice, education, research and public policy pertaining to health.

Tuesday, May 9 at 1:30 p.m.

Anatomy & Cell Biology Seminar Series

Electron microscopy: Imaging structures at the nanoscale for cell and structural biology.

Applications to Vascular Diseases, Infections and Immunology.

Dr. Bram Koster

Click [here](#) for more info

May 9-12

Canadian Microscopy and Cytometry Symposium

Pediatric Medical Grand Rounds
30th Annual Dr. Bernadette Nogrady Lecture in Pediatric Imaging

Imaging of inflammatory arthritis in children

Nancy A. Chauvin

Wednesday, May 10 at 12:00 p.m.
Neuroscience Seminar Series

Imaging and controlling cell assemblies during learning and memory

Dr. Sylvain Williams

Click [here](#) for more info

Wednesday, May 10 at 6:30 p.m.

Neuro Film Series
About 'When I Walk'

In 2006, 25-year-old Jason DaSilva was on vacation at the beach with family when, suddenly, he fell down. He couldn't get back up. His legs had stopped working; his disease could no longer be ignored. Just a few months earlier doctors had told him that he had multiple sclerosis, which could lead to loss of vision and muscle control, as well as a myriad of other complications.

Host: Dr. Zografos 'Aki' Caramanos

Friday, May 12 at 3:30 p.m.
23rd Annual Physiology Graduate Research Day

The Canadian Cytometry and Microscopy Association (CCMA) and the Microscopical Society of Canada (MSC) have joined forces to bring together international leaders with students, researchers and professionals from the fields of light and electron microscopy, cytometry and material sciences to provide a vision of where we are at and what future developments lie ahead. Click [here](#) for more info

Wednesday, May 10, 4:00 - 5:00 p.m.
Goodman Cancer Research Centre Seminar Series

Cellular and molecular mechanisms of breast cancer metastasis

Andrew Ewald, PhD

Click [here](#) for more info

May 10-11
15th Annual L.D. MacLean General Surgery Visiting Professor

Dr. Caprice C. Greenberg

Click [here](#) for more info

Thursday, May 11 at 4:00 p.m.
Neuroscience Seminar Series

Synaptic learning rules and their role in circuit function

Dr. Aparna Suvrathan

Click [here](#) for more info

Thursday, May 11, 5:00 - 7:00 p.m.
ACFAS & McGill Interactive Visits & Exhibit
À la découverte de la matière grise

How do neurosurgeons navigate through the delicate blood vessels of the brain? How does our brain interpret music, smells or optical illusions? Meet a team of experienced scientists working in the same place where scientific giants such as Wilder Penfield and Brenda Milner and many other pioneers have forged new paths in neuroscience. Click [here](#) for more info

Friday, May 12, 8:30 a.m. - 4:30 p.m.
ACFAS Workshop
Thérapie cellulaire: Comment faciliter le transfert en recherche clinique

Talks will be oriented on cell therapy which represents hope for several patients. The colossal costs and the lack of funding, knowledge and collaboration make this transfer complex from laboratory expertise to clinical research. What kind of collaboration would make this giant leap towards the patient? What are the needs in order to rapidly

Tumor Infiltrating Lymphocytes (TILs): A view to the clinic and tumor immunology

Bierman's Guest Lecturer: Dr. Pamela Ohashi
