Friday, September 7, 1:00 – 2:00 p.m.

Biomedical Engineering Seminar

Fabrication and function of biopolymeric materials

Employing a cross-disciplinary approach, this group has harnessed advanced material characterization techniques, including confocal Raman spectroscopy and synchrotron X-ray diffraction, as well as traditional biochemical approaches to investigate the fabrication of several bio-fibers, including the mussel byssus, velvet worm slime fibers and mistletoe viscin fibers. This seminar will highlight the results from their investigations.

September 6-7

2018 HCALM International Conference

Language and health - Ethical and Policy Issues

Language and health are interrelated in myriad ways, ranging from issues of physical and mental healthcare provision in multilingual societies, to health literacy and communication among patients, practitioners and policymakers, and to discourses of health and wellbeing. This year the conference will focus in particular on questions related to issues of measurement and measurability in language and health research.

Sunday, September 16

McGill Faculty of Medicine Inter-Professional

Terry Fox Run

A non-competitive fun run where individuals, families and groups walk or run one to ten kilometers to celebrate the courage and resilience of a Canadian hero. The McGill Faculty of Medicine Inter-Professional Team serves to unite students, researchers, and healthcare professionals in the battle against cancer. The annual Terry Fox Run, the legacy of Terry's Marathon of Hope, has always been about giving what you can and participating as you are able.
